To all;

Attached you will find the final version of the spreadsheet from Rensselaer County. As part of the Consent order Taconic and DEC will be maintain this data going forward. I will be putting in one last map request and when that is received I will send it out to everyone. As discussed with Sue, once we have the mapping complete I will be sending our shape files over to her so that DEC does not have to recreate all of this data.

Rensselaer County will continue to receive calls/requests for sampling and direct them to either DEC or Taconic depending on location as spelled out in the consent order. Rensselaer County will also perform any additional completion inspections/samplings of system installed by Taconic at their request.

While we are taking much of a minimal role going forward we do want to continue to be involved in calls and possibly meetings so that we may continue to monitor and provide input as this project progresses.

Richard Elder
Environmental Health Director
